

**Product: SQ-MCF****INCI Name: Microcrystalline Cellulose****Description**

SQ-MCF has a very strong capacity to hold water. Super ability to levitate. It can suspend solid active ingredients, real flowers, fake flowers, mica, ginger, cellulose/essence particles, particles of different materials. 3D nano mesh structure, can efficiently transfer the active ingredient to the skin surface, can apply the active ingredient to the skin surface, long stay time. Improve the smoothness during the use of the formula, do not change the foam structure, do not inhibit the foam. Easy to add, easy to operate, no need to dissolve or activate in advance; Both pH2-10 can be used.

**Specification**

Item	Specification
Appearance	Pale white to light yellow liquid
pH (10% aqueous solution)	3.0-4.5
Suspension force	Test beads don't sink
Transmittance (3%, 600nm)	≥75%
Solid content (%)	≥1.5%
Total colony (CFU/g)	≤200
Total mold and yeast (CFU/g)	≤100

**Features**

- Natural organic sources, safe and gentle, in line with the current trend of carbon neutrality
- Easy to add, easy to operate, no need to dissolve or activate in advance
- Economical to use, high cost performance

**Applications**

Used in facial mask, face cream and other skin care products.

**Package**

25kg/drum

**Storage & Handling**

Raw materials are stored at room temperature to avoid rain, sun and long exposure to air. Mix to uniform before use and sampling.

**Hongkong Shengqing Materials Co., Limited**
